

SEND Information Report for parents and carers

Document name:	Send Information Report for Parents and Carers	Issue Date:	November 2018
Approved by Governors:		Review Date:	November 2019

SEND Information Report for parents and carers

Stopsley High School November 2018

Welcome to our special educational needs information report. This SEND (Special Education Needs and Disability) information report is written to comply with the new Children and Families Act 2014 and the Special Educational Needs and Disability Code of Practice 2014 (0-25 SEND code of Practice). This report is additional to the school SEN policy which is a separate document.

The SEND information report documents Stopsley High School's provision for students who have SEND and it will be regularly updated to reflect current provision. This report contributes to Luton Borough Council's Local Offer.

At Stopsley High School we have adopted a whole-school approach to SEN policy and practice. Pupils identified as having SEN, including those placed by the LA in the SCD Provision are, as far as is practicable, fully integrated into mainstream classes. Every effort is made to ensure that they have full access to the curriculum and are integrated into all aspects of the school. The quality of teaching for all pupils including pupils with SEN and the progress made by pupils is a core part of the school's drive to raise standards for all teaching and support staff. Teachers strive to set high expectations for every pupil, whatever their prior attainment and use appropriate assessment to set targets which are deliberately ambitious. Lessons are planned to address potential areas of difficulty and to remove barriers to pupil achievement. The support team are able to provide advice, resources and strategies to aid differentiation of the curriculum.

1. How does the school identify and organise support for children with special educational needs?

The SCD provision, known as the Archimedes Centre, provides special education for students who are formally assessed and have an EHCP which relates to an Autism Spectrum Difficulty. A decision for entry into the provision at Stopsley High is made by the Statutory Provision Assessment Group (SPAG). As well as support to access the mainstream curriculum, the purpose of the Stopsley High School SCD Provision is to address communication difficulties and help students to develop their understanding of social situations as well as provide a calm environment where SCD students can learn away from the mainstream classrooms when needed.

The school is committed to early identification of special educational needs and adopts a graduated response to meeting special educational needs using the assess, plan, do review model in line with the Code of Practice 2014

The school has procedures in place for identifying students with special educational needs or disabilities which begins with a process of liaison with the feeder school and parents prior to entry.

Information from the previous school

Upon transfer to Stopsley High School some students will be placed on the SEN list because their

previous school has identified a SEND. A few students will have an Education Health Care (EHC) plan.

Upon entry into school

All students take a range of baseline assessments which might include Reading, Spelling and Cognitive Abilities Tests (CATs) as soon as possible after entry. Results from these assessments add to the information from the feeder school and parents alongside results of KS2 SATS results from the previous school. Where difficulties are identified students will be monitored closely and may be placed on an intervention programme to support them to make progress in the area of deficit. When placed on an intervention programme progress will be monitored at least termly and updated assessments will be carried out to assess progress and decide next steps.

Concerns raised by the individual student or parents/carers

Sometimes, a young person or family member may have a concern about the difficulties a student experiences in school. In the first instance discussions should be had with the subject teacher or Head of Department in relation to a difficulty in a specific subject area or with the Form Tutor or Pastoral Team if the concern is in relation to social, emotional or well-being issues. Pastoral Teams are able to refer students to the SENCO. If a parent continues to have concerns that a child may not be progressing despite contact with and actions following a meeting they can contact the SENCO by telephone or email or can meet with the SENCO at one of the Parents Evenings. The SENCO attends all of the Parents' Evenings.

2. Key people in the school available to discuss parental/carers concerns about their child's difficulties?

Pastoral team: Students joining the School come under the care of a Head of House who with a Pastoral Leader leads a team of ten form tutors. Parents should contact the Form Tutor in the first instance with any concern about the progress or welfare of their child.

Subject teachers: Parents should contact the subject teacher with any subject specific concern. Normally the Form Tutor, member of the House Team or subject teacher will pass on concerns about students who may have SEND or signpost parents/carers or students to the SEND department.

There will, however, be occasions when parents/carers or students may wish to approach the SEND department directly.

Key names and contacts within the SEND Department:

Gill Laskey - Special Educational Needs Coordinator (SENCO) and Deputy Lead for Mental Health. Telephone on 01582 870926 or email at glaskey@stopsleyhighschool.co.uk

Ruby Ahmad – Manager of SCD provision (Archimedes Centre) in school. Telephone on 01582 870924 or email at rahmad@stopsleyhighschool.co.uk

Pam Whiting- Assistant Head Teacher with responsibility for Inclusion and represents SEND at senior leadership team meetings. Designated Lead for Mental Health. Telephone on 01582 870946 or email at pwhiting@stopsleyhighschool.co.uk

Sharon Jeycock- Pastoral Care Manager with responsibility for child protection, students who have social care needs, students who are looked after by their local authority (Looked after Children LAC), student admissions and attendance. Telephone on 01582 542344 or email at sjeycock@stopsleyhighschool.co.uk

Parents Evenings are scheduled on the school calendar which is available on the school website. The SENCO is available for consultation at all of the scheduled Parents Evenings.

Parents are welcome to phone or email the school to request additional appointments to speak to a subject teacher, Form Tutor, member of the House Team or SENCO. School staff may contact a parent to request a meeting to discuss any concerns and plan the next steps.

3. How will parents/carers be informed about a child/young person's progress within the school and how will his/her progress be measured?

Key times/opportunities to discuss progress

Parents/Carers are strongly encouraged to attend the Parents Evenings scheduled throughout the school year. The SENCO is available for consultation at parent evenings. An appointment is not always necessary although can be booked by the student.

Students who have a an EHC Plan have a scheduled Annual Review meeting. Parents/Carers, students, the SENCO, key school staff and professional outside agency staff will be invited to attend these meetings, discuss progress and set targets. Students who are included on the school SEND list will have an opportunity to discuss their Inclusion passport with a member of support staff at least twice yearly. Opportunity to further review the Inclusion Passport and progress with parents/carers is provided at Parents Evenings or at a scheduled meeting. This may be with the SENCO.

Tracking of attainment and progress

The school has systems in place to ensure teachers regularly monitor and report on progress across the curriculum.

Progress is reported to parents three times per year through the Data Report which shows progress along the specified flightpath. The Data Report also gives additional information on effort, achievement points, behaviour points, attendance and punctuality.

Parents will also receive an annual School Report with a written report from each subject teacher in addition to the information in the usual Data Report.

If data raises a concern over lack of progress this will be acted on initially within the Department and additional strategies or additional resources may be tried by the subject teacher in

consultation with the Head of Department. Progress is overseen by the Senior Leadership Team.

If, despite high quality teaching, including differentiation and having been raised and discussed at meetings, the student continues to struggle to make expected progress; this may be referred to the SENCO. If necessary the SENCO can carry out additional assessments to identify possible causes for the lack of progress or may seek advice from one of the LA or external services.

Students who have a EHC plan have annual targets taken from the objectives written in the plan that are set at the Annual Review meeting.

Pupils who have been identified with significant Special Educational Needs will have an Inclusion Passport Review at least twice yearly where targets and support will be discussed and next steps agreed.

The SENCO has overall responsibility for overseeing educational plans for young people identified with special educational needs and/or disabilities, however, subject teachers have responsibility for the day to day management and delivery of the plan.

4. What support will parents/carers receive if their child/young person has been identified as having special educational needs?

We believe that partnership with parents/carers plays a key role in enabling students with SEND to meet their potential. The school recognises that parents/carers hold key information and have knowledge and experience that contribute towards a shared view of the child's needs and the best way to support them.

All parents/carers of students with SEND will be able to access support via the Form Tutor, Pastoral Team, Pastoral Welfare Manager, SENCO or Inclusion Manager. This support can be provided via face to face meetings, telephone contact or email.

Occasionally parents and carers may struggle to understand a medical diagnosis, a technical report, the implication of a SEND or simply wish to discuss their worries and concerns about a new development. The SEND department will listen and try to provide an additional explanation or signpost the family to support networks or specialist groups such as the Autism support groups FLAG, and DADs.

Information, Newsletters leaflets and posters on support groups for parents are posted on the school website

Parents are encouraged to contribute towards the Inclusion Passport in order to review progress, discuss strategies and interventions and set new targets.

Where referrals are made to external agencies parents will be contacted to gain consent and will generally be required to sign referral forms. Reports from external agencies are copied to parents and in some instances external agencies may meet with parents in school or at home or will communicate with parents by telephone.

5. What support is offered to ensure the wellbeing of children/young people with special educational needs and disabilities?

Stopsley is an inclusive school and strives to ensure the wellbeing of all of our students. Wellbeing is primarily supported through:-

- Teachers and form tutors who have a good knowledge of the students in their care.
- The House Team

Good attendance is encouraged and rewarded. Absences are monitored and followed up quickly. We work closely with the Educational Welfare Officer in order to provide support around attendance issues.

Pupils are encouraged to contribute their views. This may be through work with the Pastoral Team, through meetings around their Inclusion Passport or through our Student Voice forum.

Where additional support is needed above and beyond that which can be provided by the Form Tutor or House Team in the short term, referrals can be made to the Inclusion Team to identify whether more specialist intensive work is required. A graduated approach is used.

Bullying is not tolerated at Stopsley High School. The School works hard to ensure that students feel safe and that their parents/carers have confidence that systems are in place to address any bullying that might occur. The school has an anti-bullying policy and adopts a quick response to any reported or observed incidences of bullying.

School Pastoral support system

Students in the School come under the care of a Head of House who, with a Pastoral Leader, leads a team of ten tutors. Siblings are placed in the same house. Form Groups are arranged vertically with a small number of students from each Year group in each tutor group. This facilitates support for younger and vulnerable students by older peers within their tutor group.

A particular emphasis is placed on improving students' well-being through PSHCE Lessons, assemblies, Wellbeing Days, Wellbeing Ambassadors and consultation with public health.

In addition the school is able to offer 1:1 and group work including social skills groups, anger management, self-esteem and mindfulness groups. A number of groups focussed on raising self-awareness through sport and resilience are offered by external agencies including Directional and Mack Fit.

Stopsley High School is in compliance with the DFE publication "Mental Health and Behaviour in school" Ref DEF:-00327-2018. These guidelines provide advice upon a number of aspects associated with mental health and behaviour difficulties including:

- how to create a whole school culture, including promoting positive mental health
- understanding the link between mental health and behaviour
- how to identify children with possible mental health problems

- where and how to put in place support, including working with external agencies where required

Social support

Students including those with SEND are encouraged to participate and be fully included in school life. Sometimes additional adults, normally TAs, will support students to access extra-curricular activities within school or when they go out on trips and visits.

A breakfast is available for all students. Some highly vulnerable students can be supervised within the Dining area of the school before the start of the academic school day, by a Youth Worker. There are a range of supervised activities during the lunch break including a homework club. Additional lunchtime supervision is available for a small number of vulnerable students supervised by the Senior Teaching Assistant and Youth Workers.

A supervised homework club is available at the end of the school day for a small number of students requiring additional adult support.

Administration of medication to young people and Health Care Plans

Stopsley High School employs a Medical officer who deals with the day- to- day medical issues which arise in school and supervises the administration of medicines. Health Care Plans are updated as needed in line with current guidelines and shared with all staff. The school has protocols and procedures in place to include students with medical needs and ensure that they enjoy the same opportunities as their peers.

6. How will teaching be adapted to support the child/young person with special educational needs?

All teachers are teachers of pupils with special educational needs. Special Educational Provision is underpinned by high quality teaching that is differentiated and personalised to meet individual needs and is compromised by anything less.

Subject teachers have responsibility for differentiation and the effective use of additional resources including extra adults within the classroom. Teachers have high aspirations and set all students individual, achievable and challenging subject targets.

Differentiation may take the form of adapted resources, differentiated tasks and / or a modified curriculum. The SENCO provides information and advice to all staff on SEND and strategies to support students including via the weekly staff bulletin, quizzes and a bank of online resources and advice.

The SEND Department work alongside subject teachers and may provide advice and additional resources to support teachers in delivering high quality teaching that is differentiated and personalised to meet individual needs. Inclusion Passports for students with SEND provide advice and strategies to help teachers differentiate for individual students.

Where external agencies are involved additional advice will be provided from the reports

received to advise teachers further on how to support individual needs.

7. What different types of support can the child/young person receive in school?

All teachers have appropriate qualifications and are teachers of students with special educational needs. All teachers and support staff receive appropriate training to ensure they are kept informed and up to date with new developments and research. Individual staff may receive specific training to meet the needs of a particular child or group of students.

Support for all students is provided according to their individual needs to remove barriers to learning.

SEND resources are allocated in a variety of ways to overcome barriers and enable progress; this could include:-

- Participation in intervention groups such as literacy, numeracy, social skills, self-esteem, anger management and re engagement programmes.
- Timetables may be adapted to meet individual needs (for example by reducing the number of subjects studied or options chosen at GCSE).
- In-class support from TAs
- 1:1 or small group work to address individual targets
- Access to specific adapted resources to enable them to access the curriculum more effectively. This may include, laptops, writing slopes, coloured overlays or exercise books, specialised pencils, pens and grips. We are able to purchase individual items as advised by external agencies.
- In a small number of cases a range of small off-site educational providers may be considered as a temporary base for learning. For any such placement the school uses provisions which are Quality Assured and approved by ALPS, (Alternative Learning and Progression Service).

8. How will the school support your child/young person in unstructured times such as lunchtimes and playtimes and enable her/him to have access to after school clubs, school trips and journeys?

School lunchtime clubs and activities are provided throughout the school week and students access these on a voluntary basis. The library is also open during the lunch break and some tutor rooms are open for students' use. The main area of school for additional support is Student Support which is open from 8am until 4pm Monday to Thursday and 8am until 3.10 on Fridays.

Some very vulnerable students are supported by SEND staff before school and during break times. Some students can report to the Student Support area before 8.15am to seek support or raise a concern. From 8.15am onwards a Youth Support Worker is based in the Dining area to provide additional support. At break time vulnerable students can play games, chat with others and adults in the Student Support area.

A homework club is available in Student Support at the end of the school day Monday to Thursday until 4pm.

A very small number of students may have the use of an early lunch pass which allows them to go direct to the front of the lunch queue and a Senior Teaching Assistant is available to supervise

a small group of vulnerable students in the Dining Hall whilst they eat lunch. This support is available to a very small number of students who are likely to find the busy dining room stressful due to SEND.

Specific arrangements may be made for particular children to meet their individual needs during lesson changeover for example by leaving late / arriving early to lessons. This will be facilitated through information in the Inclusion Passport and may include access to a Pastoral Pass which students can show to adults to allow them to leave the classroom early.

Students with SEND may have access to additional opportunities in school such as disabled sports activities. Reasonable adjustments are sometimes required to include students with a disability in social and academic extracurricular activities and TAs may be timetabled to support these on a voluntary basis. Risk assessments for individual pupils and for particular activities are completed in conjunction with the SENCO where relevant and necessary. Additional support may be provided on school trips and visits as required. The School complies with the Disability Discrimination Act (2010) in making reasonable adjustments to support students with SEND to be involved in the full life of the school as far as they are able and wish to.

All students are encouraged to take part in a two week work experience placement in Year 10. Where appropriate vulnerable students with SEND can be supported to seek placements, attend interviews and prepare for their work experience placement by members of the SEND team. Where a student has a Link TA, in a very small number of instances, they may benefit from support for part of the work experience by their Link TA during their placement. This is generally a very time limited arrangement consisting of short periods of support during the first day or two of the placement.

9. How does the School involve children/young people in decisions that affect them?

We aim to ensure that all learners are encouraged and supported to express their views and are fully involved in decisions which affect their education as much as possible and as far as they are able. Student Voice plays a vital role in enabling students to give their views and opinions on school life and the school community and to participate actively in effecting change.

For some students with SEND the decision making process requires greater nurturing and support, in order to contribute their views in ways that allow them to feel comfortable and confident. These may include:

- Expressing their views and support needs on their Inclusion Passport.
- Contributing to academic and social target setting and reviews.
- Contributing to the decision making process about next steps in learning.
- Contributing to the Annual Review of the EHCP or Inclusion Passport.
- Participating in questionnaires about the support made available to them in lessons and giving advice on what other strategies may support them.

Students with SENDs have equal opportunity to access positions of responsibility including Student Voice, Mentoring and Prefect roles.

10. How are the school's resources allocated to support children/young people with SEND?

The School allocates its' resources for SEND in accordance with the money allocated to the school by the Local Authority.

The school receives "top up funding" for all students with an EHCP (Educational Health Care Plan). For students with an EHCP the school also provides additional support from its main budget for 12.5 hours weekly.

A proportion of the School's delegated budget is available to those other pupils with identified Special Educational Needs and / or Disabilities. This budget is used for staffing, resources, diagnostic assessment materials, reference materials and staff training. SEND support across the School is allocated according to individual needs and where necessary with advice from external professionals.

SEN funding is also used to maintain Service Level Agreements with the Educational Psychology Service, Learning Support Service and ALPs (behavioural support and advice).

Where a student consistently requires very high levels of school funded SEN support beyond that available from the schools' delegated budget for SEND the school may gather evidence for an application to the Local Authority for a statutory assessment which may lead to an EHCP and personalised "top up funding".

Where students receive support through SEND funding school uses progress data, behaviour and achievement data and individual assessment to inform the type and frequency of provision. Support is allocated on a needs basis and may be delivered individually or in a small group for a specified amount of time. Further data and assessment will be used to evaluate the effectiveness of provision alongside information from subject teachers on curricular progress. Progress is reported to parents/carers and the school Governors.

The SENCO is responsible for overseeing SEND funding and ensuring resources are used effectively to remove barriers to learning and to support student progress. The SENCO provides a written report evaluating the effectiveness of the SEN provision to the Governing Body at least annually and meets with the SEN Link Governor on a regular basis.

11. What services external to the school can provide support to children with SEN?

As a School we seek to develop effective working partnership with students, parents and carers. We also draw upon the expertise of a wide range of external professionals to support students with SEND. Parents are consulted before referrals are made or before a visit is arranged.

External agencies may be used to carry out student observations, provide reports and advice for teachers and parents, provide staff training and to attend professionals meetings. In most cases a detailed report containing strategies and recommendations is provided for parents/carers and school following a visit. The advice contained in the report is generally used to provide advice and strategies on the student's Inclusion Passport which is distributed to all staff. Information is handled with sensitivity and, where information is confidential, will be treated as such and shared only on a "need to know" basis in line with DPP

The external agencies we use include:

Local Authority Special Educational Needs Service (SENS)

Educational Psychology Service (EPS)

Local Authority Autism Team (ASD Team)

Local Authority Learning Support Advisory Teacher

Child and Adolescent Mental Health Service (CAMH), including CAMHs School Liaison Officer

Speech and Language Therapy Service (SALT)

Occupational Therapy (OT)

Physiotherapy

Hearing Impaired Team (HI)

Visually Impaired Team (VI)

The Edwin Lobo Child Development Centre (ELC)

Outreach Team from Lady Zia Wernher

Alternative Learner Progression Service (ALPS)

School and Community Nursing Service

Social Services

Avenue Centre for Education (ACE)

The Virtual School for Looked After Children (LAC)

Luton SENDIAS (Special Educational Needs and Disability Information Advice and Support Service) formally Parent Partnership

SEND Transition Workers

Counselling Service

MACK Aspirations

Young carers

CHUMS

Where parents feel they may benefit from independent advice on SEN the SENCO can signpost to SENDIAS

12. How are staff in the school supported to work with children/young people with special educational needs and what training do they have?

All teachers are teachers of students with special educational needs. Special Educational Provision is underpinned by high quality teaching that is differentiated and personalised to meet individual needs and is compromised by anything less. Teachers will encounter a wide range of pupils with special educational needs, some of whom may have disabilities. In many cases, the action necessary to respond to an individual's needs for curriculum access will be met through differentiation of tasks and resources, consistent with school-based intervention (K) as set out in the SEN Code of Practice.

All teachers receive regular and appropriate training in order for them to deliver high quality teaching that is differentiated and personalised to meet individual needs. This training will be a mixture of "in house" and externally sourced training as part of Continual Professional Development. All school staff complete annual training in safeguarding and PREVENT training. Advice and strategies for SEN students are also shared with Teachers through the weekly Staff

Bulletin.

The SENCO is able to observe students and to meet with teachers to provide advice and strategies to support SEND in the classroom. Vulnerable Children and Inclusion Team meetings are held regularly and may include discussions around SEND. Occasionally meetings of a student's teachers may be held to share strategies and advice on support needs.

The TA team meet regularly for discussion around student needs and in house training on SEND. All TAs have received training on carrying out exam access arrangements. Many of our TAs have completed the Online INSET course in ASD and new TAs will be encouraged to complete this training. During the academic year 2018-19 all Teaching Assistants will receive training in recognising and responding to the early signs of mental health. Where appropriate TAs and teaching staff can be provided with individual training in response to needs. New TAs take part in an induction programme which includes shadowing of experienced TAs and meetings with the Senior Teaching Assistant and SENCO.

The Manager of the SCD provision Mrs Ruby Ahmad is qualified to provide training to staff through the ONLINE INSET programme on SCD and Speech and Language Difficulties. TAs in the SCD provision benefit from regular specific training and meetings in order to meet the complex needs of the students placed within the provision.

As a School we also draw upon the expertise of a wide range of external professionals to support students with SEND. We have close links with the Local Authority SEN team. Where outside agencies deliver intervention programmes TA's are often allocated to support the delivery and thereby develop the skills to deliver further interventions in house. Recently two members of staff have shadowed Mindfulness lessons with the school Educational Psychologist and are now able to offer this intervention to students.

The SENCO and SCD Manager have accessed various training opportunities provided by the local authority and national agencies to maintain and develop their professional competencies. The SENCO and Inclusion Manager attend the Luton Futures meetings in order to benefit from joint training and to share expertise.

13. How will the school support the child/young person in moving on to another school or college or to the next key stage in their education or life?

Moving to Stopsley from primary school

Transition to high school is a key phase in a child's life. Making the move to secondary school is a milestone in every child's life and, as with any change it needs to be prepared for in advance.

For most families, preparation will start in the final year of primary school as soon as your child returns to school following the summer holidays. For some (including those with SEND) the preparation may need to start sooner.

We work very closely with our 3 main primary feeder schools (Stopsley Primary, Bushmead Primary and St Matthews Primary) especially at times of transition.

During Year 5 links are made via curriculum days and, in Year 6, as soon as the cohort for Stopsley has been identified the transition process will begin.

We have an effective transition programme and established links with our primary feeder schools, which includes:

- School staff visits to the primary school to familiarise themselves with pupils
- Curriculum days including English, Maths and PE
- Meetings with key staff from Primary schools to discuss individual pupil's needs
- Additional advice and support sought from external professionals
- Transfer and exchange of information, which includes assessment data
- Transition Days and evenings (attended by a range of staff including Inclusion and SEN key staff)
- Additional visits to the School
- Summer school activities

For students with SEND additional and extra support may be put in place. Students with EHCPs have an early planned transition. The SENCO will normally attend the year six annual review of the EHCP(following a placement at the school being agreed). Sometimes external professionals such as the Educational Psychologist/SCD team or Learning Support Advisory teacher will work within both schools to provide advice about the provision required. Generally this will be via a Transition Meeting which the primary school SENCO will organise. The parent/carer, student, high school SENCO and sometimes outside agency staff will be invited to attend this meeting and a plan detailing extra visits or staff training that may be needed to support transition will be drawn up by the LA.

Those with an EHCP and other very vulnerable students with SEND are invited to at least one extra visit with the SEND department. SEND staff may visit students in their primary school, talk to teaching and support staff and with the student. A Transition Booklet including photographs and information about the school is produced for some students to use over the holiday period to remind them and their family of the plans for September and arrangements in school. SEN prefects help to produce the Transition Booklet, help during transition visits and are available to support vulnerable students during unstructured times when they are on prefect duty.

For some students with EHC plans, preparation and planning occurs earlier at the end of year five. Sometimes parents/carers wish to visit a range of schools to investigate what provision the school can make before they make decisions on their High School choice. The SENCO is available for 1:1 consultation at the Open Evening during the Autumn term of Year 6 and again at the Transition Evenings during the Summer term. If parents/carers are unable to attend these evenings the SENCO welcomes contact and is happy to arrange an appointment to discuss concerns, individual needs and possible SEND provision prior to enrolment at school.

Moving from Key Stage three to four

During year nine there are many opportunities for students and their parent/carer to be informed about the range of KS4 option choices and to discuss the appropriateness of certain option

choices with school staff. The SEND department provides additional support and guidance for students and parents/carers to explain and support appropriate KS4 choices. Some SEND students and their parents may be invited to a pre Options Evening meeting to discuss option choices with members of the SEND Department and Inclusion Team. Some students with SEND may reduce the number of GCSE options they choose and use some of this curriculum time for extra work to support their option choice, or develop basic skills. In the main all students are expected to begin Y10 with 3 options choices on their timetable. Decisions about whether students may require a reduction in GCSE studies will be made after settling data has been distributed.

Moving from school to post 16

Post 16, the School liaises closely with parents/carers and students to provide:

- Support with applications
- Taster visits
- Support with attendance at College and Higher Education Open Days
- Support in applying for apprenticeships

Students with a EHCP will be supported by the LA SEN Transition Team throughout this process. School will liaise with the Transition Team and seek their attendance at reviews from Y9 onwards as needed. The Transitions Advisor will work with the student, parent/carers, school and post 16 provisions to plan for transition and to provide advice on needs to college via the EHCP. The Transitions Team will continue to work with students with a EHCP as they move into Post 16 education.

Where students declare their special educational needs on their college application forms the SENCO is able to provide additional information and advice to the post 16 provider. The SENCO may be able to meet with staff from the Post 16 provider to discuss support needs. Students with SEND may need additional support for visits to local colleges. The SEND Department may be able to support this. The SEND department aims to achieve a balance of support and independence skills so that in year eleven students are self-confident, informed and able to contribute their opinions and make decisions about the next stage in their life. During KS4, some students access additional SEN support to help develop their life skills.

In line with the Data Protection Policy the school are unable to provide advice on SENS unless students/parents have agreed to this on their college application form. The signed access arrangement form will be given to parents as students leave the school. It is the responsibility of the parent/student to share this information with their Post 16 providers in order to ensure access arrangements are continued.

14. How accessible is the school environment?

The school is a new school build opened in January 2017. The school is fully accessible. The school is built over 3 floors with lift access. Students must be accompanied when using the lift.

The school has Disabled toilet access and 1 Therapy Room, one of which is equipped with a disabled (seated shower) and rise and fall therapy table.

Students who have specific difficulty with the physical process of handwriting may use writing slopes, specialist cushions, adapted pens and scissors, laptop access and if appropriate, dictaphones to record their work. Scribes may also be used if the student meets assessment criteria. Information can be provided in enlarged print or on coloured paper as needed for parents and students.

Parents/carers who have English as an Additional Language may use school staff as interpreters at official school meetings. If school staff are not available to support the mother tongue translations an official translation agency may interpret important meetings.

Please also refer to the School's Accessibility Plan and Equality, Information and Objectives document which are available on the school's website.

15. Who can parents/carers contact for further information at the school?

Parents/carers who are concerned about the progress or welfare of their child should contact the Form Tutor or House Team in the first instance, who will liaise with the appropriate staff in school to provide additional support and intervention if needed.

Subject specific enquiries should be addressed to the child's subject teacher. If the subject teacher feels a child has a specific difficulty and requires additional support they will liaise with the SENCO. General information on the school's policies and procedures and communication with parents can be found on the school website.

If your child has additional needs and you are applying for a place at the school you may wish to contact the SENCO to request a meeting and a visit to the school. Information about additional needs will be discussed during the initial admissions meeting.

If your child has a EHCP you will need to contact the Special Needs Assessment Team at Futures House. Telephone: Rosie Newbury: 01582 548130

The local offer for Luton Local Authority can be found at the following web address:
<https://directory.luton.gov.uk/kb5/luton/directory/family.page?familychannel=11>
